

Company Policy

Environment

Big enough to dare,
small enough to care.

Sustainable action and active environmental protection are of particular significance for us. By way of a sparing treatment of resources, we ensure a liveable environment also for the future – both for ourselves and our descendants.

We produce in an environmentally friendly and resource-sparing way. We minimise existing and possible consequences for the environment by

- the determination of environmental indexes and the observation of their development
- the setting of environmental targets and the regular verification of their attainment
- the utilisation of the best available technology while considering ecological and economic aspects.

Beyond the fulfilment of the legal regulations, we keep striving for the continuous improvement of our environmental performance.

The Board
