

# Dairy & Food

Big enough to dare,  
small enough to care.

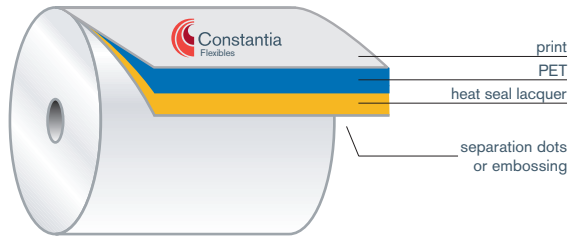

Closeness to our customers guarantees  
optimal innovative packaging solutions

## Die Cut Lids – World Market Leader

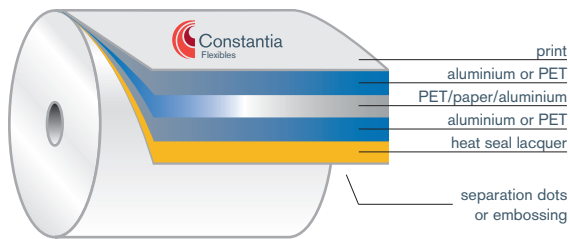

### Embossed or Unembossed Die Cut Lid

- seals to all common plastics
- optional logo separation dots
- optional partial embossed

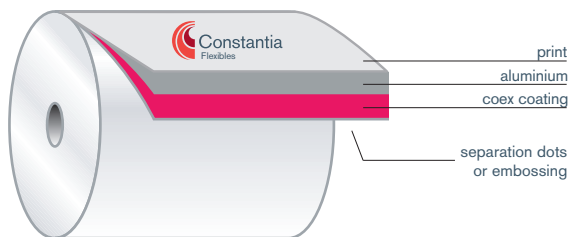

### Plastic Die Cut Lid

- standard PET lid
- transparent
- white
- microwaveable

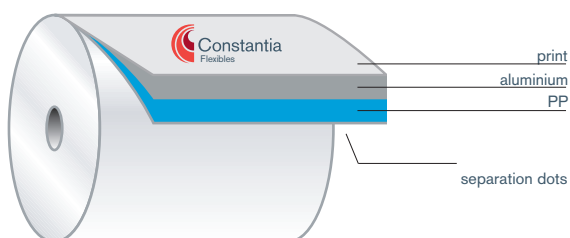

### Laminate Die Cut Lid

- increased burst strength
- suitable for use with metal detection system in case of Paperlid
- individual solution

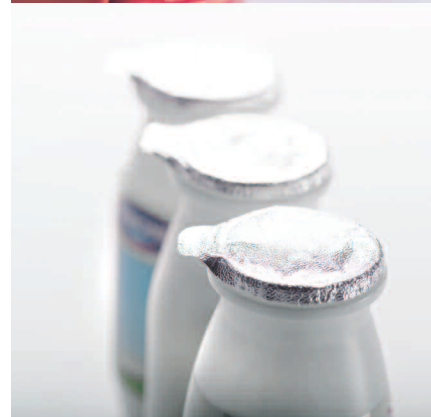

### Coex Die Cut Lid

- advanced technology
- seals to all common plastics
- low temperature seal PP/PS version

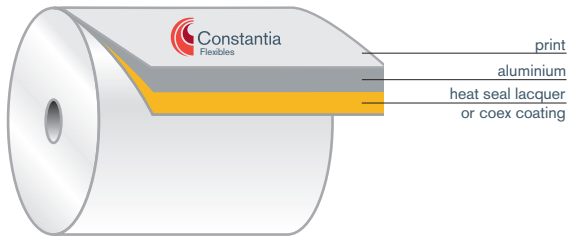

### Comfor Lid

- “state of the art” lid – peel open alufoil pouring/drinking aperture
- runs on standard die cut machines
- convenience packaging for “on-the-go” consumption
- microwaveable option
- optional reclose

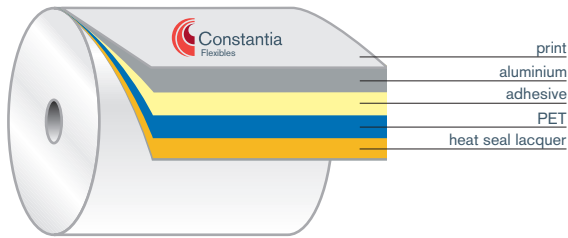

## Form-Fill-Seal (FFS) Reels – Innovation Driver

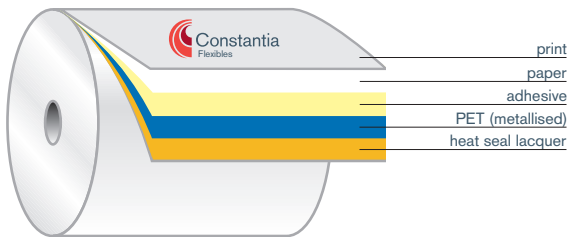

### Aluminium

- well known solution for FFS equipment
- seals to all common plastics
- excellent barrier properties

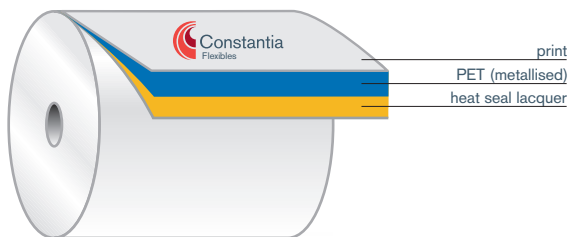

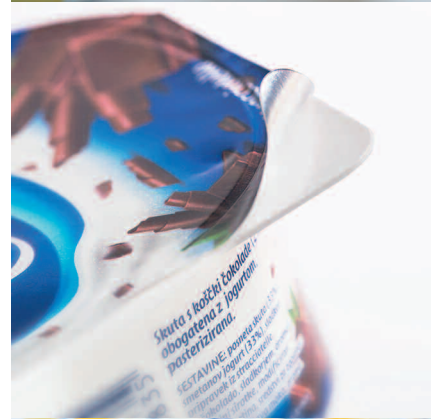

### Aluminium / Polyester

- increased tear resistance
- high barrier properties
- excellent puncture resistance
- seals to all common plastics

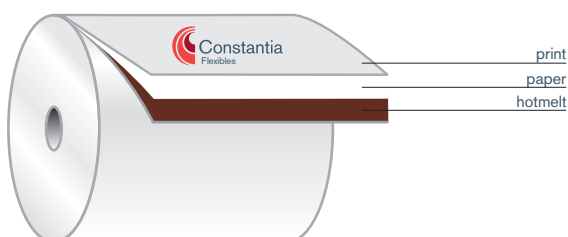

### Flexpap

- non aluminium laminate for FFS equipment
- seals to PS
- excellent machine performance

### Mono-FFS-Web

- excellent rotogravure and UV-flexoprint quality
- outstanding peel ability
- state of the art lidding material for FFS-equipment for highest requirements
- seals to all common plastics
- all types of sterilisation possible

### Banderole

- FFS pot decoration with high value print reproduction
- excellent machine performance
- optimal pot stability

## Wrap Around Labels

### Transparent or White

- front side printed (white voided OPP)
- reverse side printed (transparent OPP)
- suitable for cylindrical containers
- wrap around labelling machines

### Shrinkable Wrap Around Label

- reverse side printed
- heat shrinkable
- shrink rates up to 14%
- suitable for slightly contoured containers
- modified labelling wrap around machines with shrink tunnel

## Sleeves

### Shrinksleeve

- reverse printed sleeve
- shrink rates up to 75%
- suitable for heat shrinking of almost all container shapes
- sleeve application machines with shrink tunnel

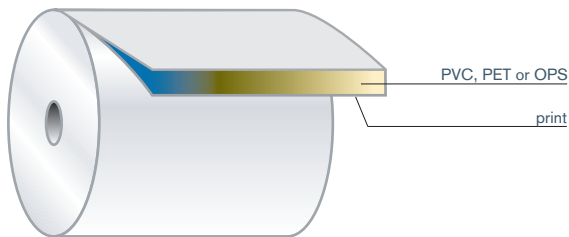

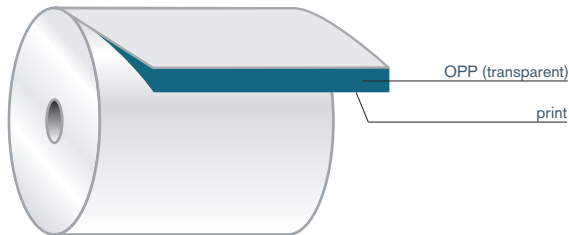

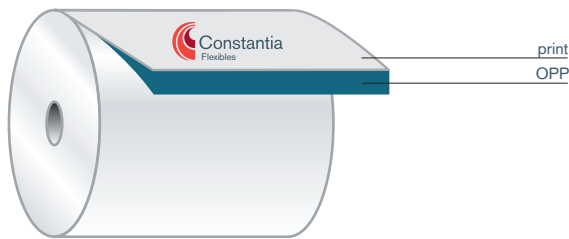

## Laminated Wrappers

### Yellow fat & Soft Cheese

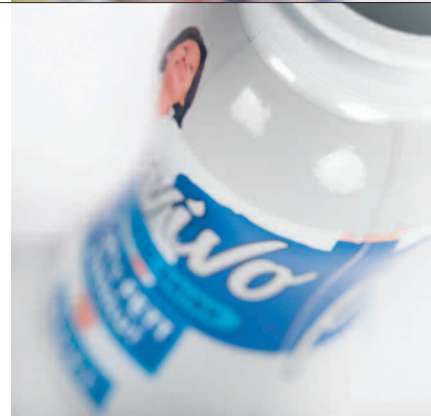

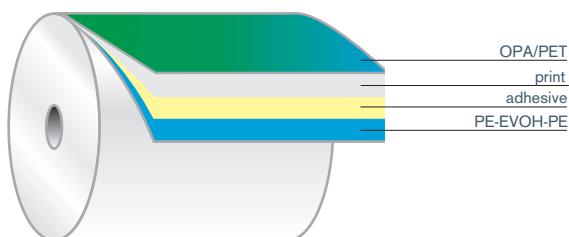

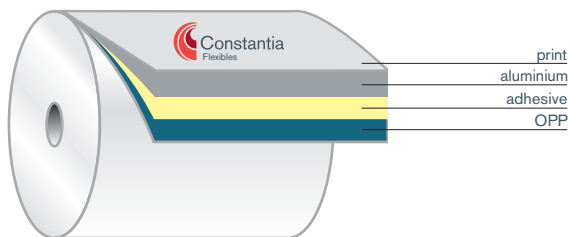

- various specifications
- excellent deadfold properties
- high barrier
- premium image
- excellent fat resistance
- embossing option

### Hard Cheese Film

- suitable for block, sliced and grated cheese
- matt / gloss print options
- fast sealing
- ideal for vertical and horizontal flowwrapping
- optimized product shelf life

Graphic: Yellow Fat Wrapper

## Monoweb Foils – Market Leader

### Insect Proof Foil

- (thermo) heatseal lacquered
- unsupported or lacquered insect proof foil
- water based environmentally friendly sealing system
- chlorine free

### Novelty Foil

- individually specified aluminium quality
- optional Tepro<sup>2</sup>®
  - increased tear resistance
  - outstanding deadfold
  - improved machine performance

## Duplex Laminate Foils – Quality & Experience

### Chocolate Bar Wrapper

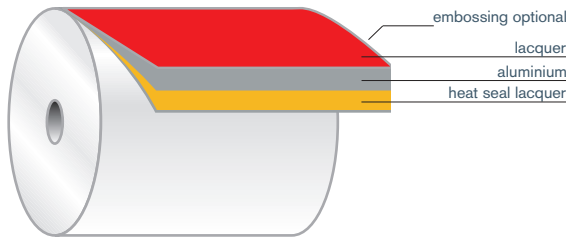

- outstanding laminating technologies
- excellent fold properties and optimum flatness
- exclusive styling of print design

### Chewing Gum Outer Wrapper

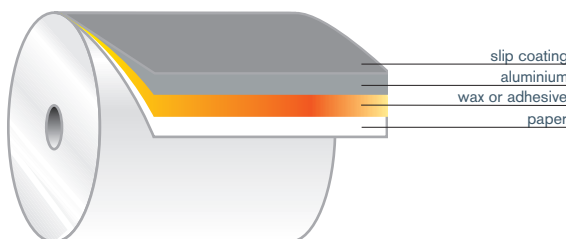

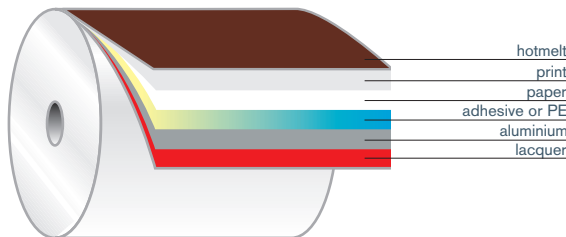

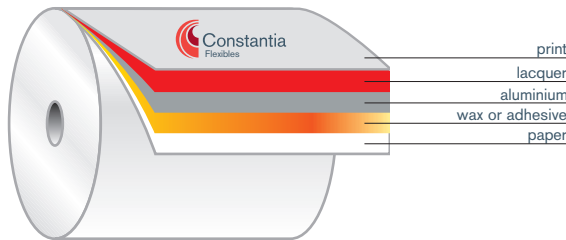

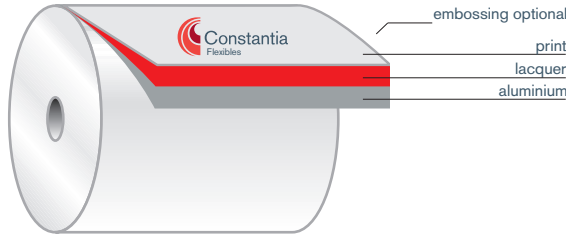

- best H<sub>2</sub>O and O<sub>2</sub> barrier
- highest product quality
- individually tailored sealing system

### Chewing Gum Inner Wrapper

- excellent machine performance
- excellent deadfold properties
- proven product protection

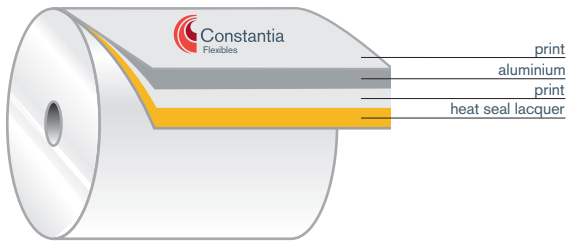

Graphic: Standard Novelty Foil

# CONFECTIONERY WRAPPERS

## Blister – Market Leader

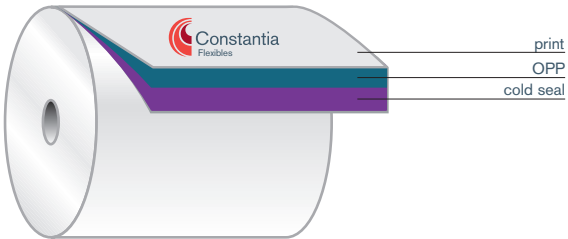

### Blister Foil

- seals to all common plastics
- individually tailored heat sealing system
- optimal print image composition on both sides of the aluminium

## Monoweb Film

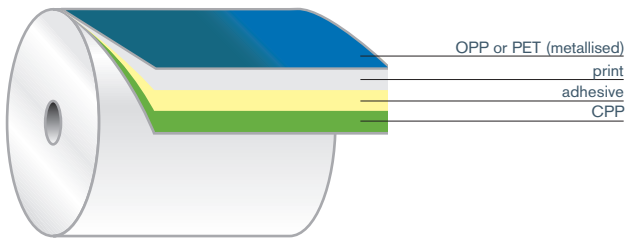

### Flowrap

- precision applied cold seal
- special ink effects
- excellent packaging machine efficiencies

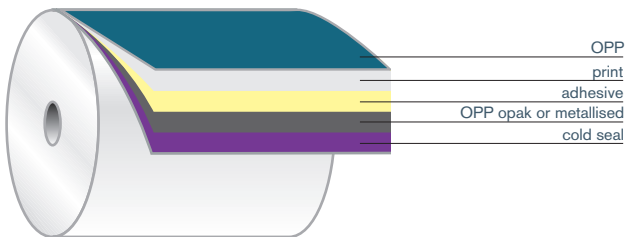

## Duplex Film Laminate

### Duplex Barrier

- various specifications
- fast sealing
- ideal for hanging bags
- lap or fin seal options
- ultra high moisture & gas protection

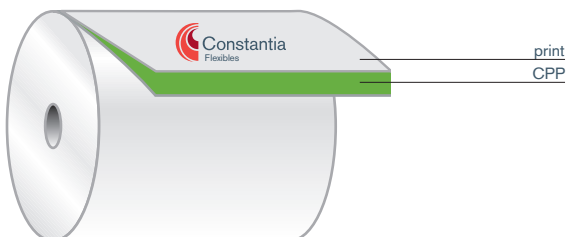

### Duplex Cold Seal

- excellent packaging machine efficiency
- aroma protection
- fast sealing
- excellent gloss

## Twist (e.g. Wrapstar®)

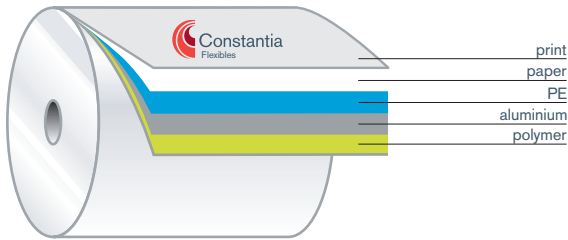

- inhouse manufactured film
- outstanding twisting properties
- excellent deadfold
- metallising option
- runs well on all wrapping machines

## High Barrier Tandem Extrusion Laminates

### Standard Soup Pouch

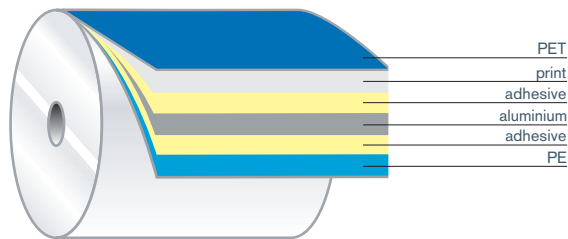

- good barrier properties
- good rigidity
- fast sealing
- gravure or UV-flexo printed

## High Barrier Triplex Laminates

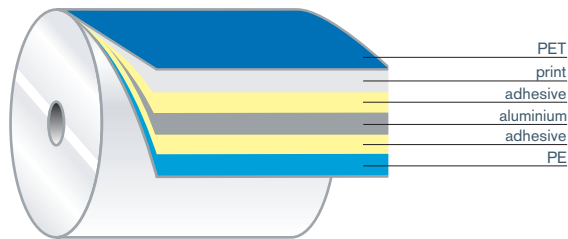

### Sustain Pouch

- less packaging material and weight
- long shelf life
- first class puncture resistance
- good stiffness
- reverse print

## Film/Foil Laminate

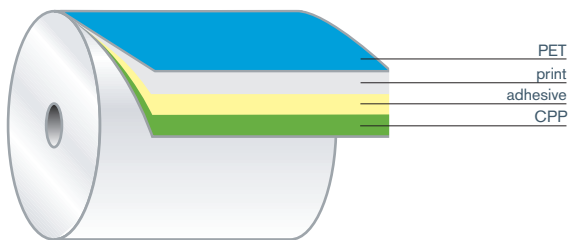

- excellent gloss
- good puncture resistance
- good stiffness
- fast sealing
- excellent barrier properties

## Flowpacking Laminates

### Duplex Film Laminate

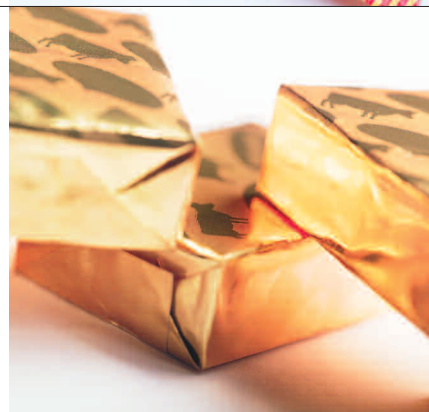

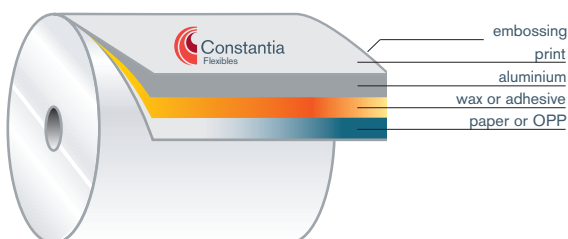

- excellent gloss
- good puncture resistance
- very fast sealing
- in-house metallising option
- excellent moisture barrier

## Bouillons

### Foil Laminate

- various specifications possible (PE coated paper, hotmelt in register)
- embossing possible
- high fat resistance
- excellent moisture barrier
- outstanding deadfold
- good sealing properties

## Innovation Speed Team (IST) & Innovation Communication Team (ICT)

Our most important task is working with customers today on the packaging solutions of tomorrow. With this in mind we see ourselves as more than suppliers of packaging materials; we are competent partners for packaging development and marketing. In practice this means that part of our daily business activity is a high level of work and to work very closely with our customers. In this way it is possible for us to develop products that meet consumers requirements and have longevity. The remit of our Innovation Team includes service and consultancy innovations as well as product and design development.

## Dairy & Food Innovations

### Pot Sealing Systems:

- Comfor Lid – various applications and functions
- Customized Embossing
- Double Lid
- Glass Sealing
- Inkjet Print
- Low Seal Lidding
- MattFlex
- Mono-FFS-Web
- Paperlid
- PPPeel
- Relief Embossing
- Shiny Banderole

### Portions Packs for Hot drinks at home/office:

- Chocomel Hot
- Espresso System
- Tassimo

### Dairy Labels & Wrappers:

- Brick Foil
- Cheese Wrap
- PLA Shrinksleeve

### Confectionery Wrappers:

- HiPer-Wrap
- LogoLam
- Tepro<sup>2</sup><sup>®</sup>
- Wrapstar<sup>®</sup>

### Dried & Wet Food Packaging:

- Contrasts
- EcoLam
- Flex&Cut
- Reduction Pouch
- Stick Pack
- Sustain Pouch
